AETV-CG

SUBJECT: Enclosure 6 Battle Rhythm (Taskers) to V Corps Command Training Guidance for FY 05-06

1. **Purpose.** To provide a methodology for Corps Taskers in FY 05/06

2. **References.**

a. USAREUR Regulation 350-1, Training in USAREUR, 22 July 2002.

b. USAREUR FRAGOs #158 and #163 (USAREUR OIF Deployment, Redeployment, Reintegration, and Reconstitution) to OPORD 1003v-03 (CLASSIFIED).

3. **Objective.** To provide predictability and stability for Corps units conducting reintegration and reconstitution following OIF 1.

4. **General.**

a. The Corps redeployment from OIF 1 occurred during a relatively short timeframe. As a result the majority of Corps units will be in the same phase of the 270 day battalion model for reintegration, reconstitution, and retraining at the same time. The sequential progression through the DR4 process precludes staggering of training exercises to establish Red, Amber, and Green training cycles. As a result, the Corps must use other tools to manage taskings.

b. Until training cycles can be established, Corps G3 Operations will manage tasking using the following methodology:

(1) Review the USAREUR DR4 report to maintain situational awareness of current unit status.

(2) Coordinate with units to verify impact of tasking on unit operations.

(3) Review unit training schedule via the V Corps Training Calendar in order to minimize the impact of taskings on training.

(4) Establish a historical record of taskings during the DR4 process in an effort to maintain an equitable distribution of taskings.

c. The goal of this tasking methodology is to allow for an equitable distribution of taskings and to minimize the impact of taskings on the DR4 process.
